HYDRAULIC SEAMLESS STEEL TUBING SOLUTIONS

COMPLETE HYDRAULIC TUBING SOLUTIONS

SEAMLESS PRECISION STEEL TUBES

Our steel tube range is manufactured to OEM specifications and designed for full integration with flexible hoses, fittings and quick couplings.

- Carbon steel and stainless steel
- Zinc-plated or phosphate-coated finishes
- Diameters from 4 to 300mm (3/16" to 8")
- Supplied in standard 6.0-metre lengths
- High production accuracy
- Advanced 3D Greometry-measirement technology
- High cleaniless levels - up to NAS 6 or ISO 4406 16/14/11, or better

PIPE CLAMPS

Design for quick and easy pipe and hose installation while maintaining a clean, organised system layout.

Our hydraulic pipe clamps help refude vibration and noise, supporting safer and more environtmentally responsible operation.

- Industrial, mobile, marine and offshore hydraulics
- General industrial pipping systems
- Mining and construction equipment
- Instrumentation and control systems
- Pneumatic systems

STANDARDS AND APPROVALS

SIRIM QAS INTERNATIONAL

Our steel tubes comply with recognised international standrds and are SIRIM-approved, giving you confidence in quality and reliability

- DIN 2391-1:1994
- BS EN 10305-1:2016
- SIRIM-approved
